FAR INFRARED RAY TECHNOLOGY
FIR light waves heat surface areas without the use of fan or forced air. Heater stays cool to touch while in use.

HEALTH BENEFITS
FIR stimulates circulation, increases blood flow and boosts oxygen levels. Helps reduce physical stress by relieving aches and pains. Boosts mood by stimulating endorphins.

GENTLE HEAT
FIR safely heats surface areas providing a consistent comfortable heat. Perfect for use indoors and outdoors. Safe to use around children and pets.

AIR QUALITY
FIR does not use forced air or fan technology so it won’t disturb dust or allergens. Won’t dry skin or irritate sinuses. Maintains air quality, does not deplete moisture or oxygen levels.

**PRO-TIP:**
Only use bulbs that are below the maximum wattage (150W).
The cord’s maximum wattage (1,500W) does not increase with multiple strings connected.
Lower wattage LED bulbs are the recommended choice when connecting multiple cords.

**PRO TIP:**

**ONCE YOUR HOOD IS UP, AND FLASHERS ARE ON, YOU SHOULD PLACE TRIANGLE REFLECTOR TRIANGLES NEAR YOUR VEHICLE TO DIRECT ONCOMING TRAFFIC AWAY FROM YOUR VEHICLE.**

As a rule of thumb, you should put the first warning triangle 10 feet directly behind your car on the side closest to the road.

Then place the second warning triangle 100 feet behind your vehicle, lining it up directly in the middle of your car’s position.

Finally, put the third warning triangle 300 feet from your car, lined up with the side of your vehicle furthest from the road.

This alignment will help catch the attention of oncoming traffic and is the universal sign of distress when on the road.

Always watch for oncoming traffic and other dangers as you place the warning triangles behind your vehicle.
